Committed to you

EASY
TO SELL

LiveIn2 means you can offer to your customers the possibility of controlling their devices from their smartphone or tablet, regardless of whether they are at home or on the move.
This is the simplest remote control there is - the one that's always within easy reach!

CONSISTING OF A BOX AND A DEDICATED MOBILE APP, LIVEIN2 IS:

- a solution that focuses on the roller shutter's core business, and has consequently been extended to similar and complementary applications around the home.

- enhanced by its compatibility with a new BHz radio range enabling you to offer devices **with information feedback.**

- with new functions that will enhance the user experience.

LiveIn2 box

EQUIPMENTS

You can control your devices directly and by group from home or on the move.

SCENARIOS

Create your scenarios to perform a sequence of orders on several devices using the app.

NEW

Transmitter scenario LiveIn2: from this point of command, the user can play 2 LiveIn2 chosen scenarios.

EASY
TO INSTALL

With LiveIn2, every detail has been simplified and designed for you, the professional.

You can carry out a LiveIn2 installation from the mobile application autonomously without having to create an account.

Whether you are a manufacturer in a factory or installing the product in a customer's home, configuring the equipment is very easy.

All the user needs to do then is create their user account and personalise their installation with scenarios, clocks, etc.
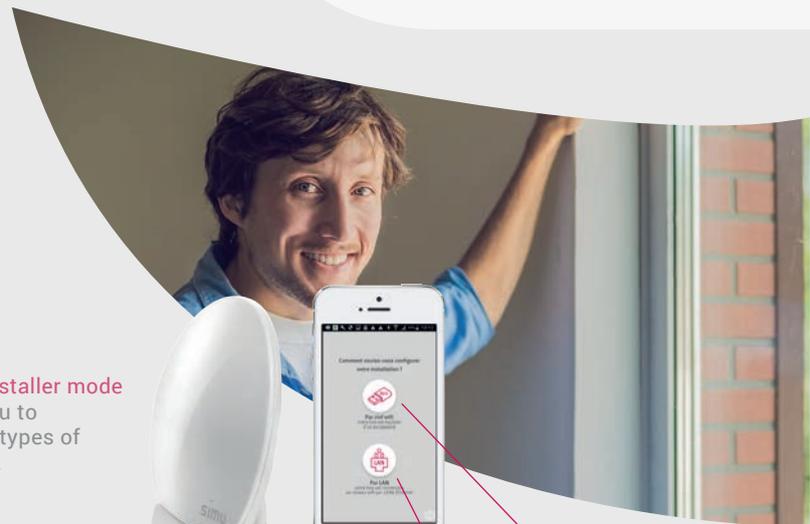

LIVEIN2 APP INCLUDES:

- a flexible installer mode enabling you to manage all types of installation.

- help screens to assist you in configuring equipment and troubleshooting.

connection without an account

by LiveIn2 Wifi key accessory: to pair equipment without using the customer's Internet connection.

by LAN cable: for a known Wifi connection.

GUARANTEED CONTINUITY AND SCALABILITY

With the LiveIn2 solution, SIMU has opted for strong partnerships to sustain a promise of continuity and scalability for you, the professional, and for the user.

THE LIVEIN2 SOLUTION INCLUDES:

Dual embedded technology: Hz radio and new BHz radio. Your Hz projects are followed and are made compatible with BHz modernisation.

Functions are upgradeable thanks to application updates and new peripherals compatible with the LiveIn2 box.

simu-BHz technology   **simu-Hz** technology

SENSORS

The addition of the BHz exterior sun sensor means that you can now create conditions for automating your shutters depending on the level of sunlight.

NEW

CLOCKS

Automate your devices and scenarios based on pre-determined times.

GUARANTEED SUPPORT

SIMU is fully committed to assisting you both in selling the solution to the user and for its installation.

A DEDICATED WEBSITE
www.livein.simu.com

All the info available online for your customer to find out all about the solution.

NEW

simu-BHz®
technology

βidirectionnal

WHAT IS BHz?

This is the new radio range **with information feedback** developed by SIMU, a range based on a reliable and secure technology.

- 868 MHz radio frequency
- With 3 possible frequency bands (automatic selection of the best one)
- Radio installation secured by a unique 128-bit encryption key
- Effective range of 20 metres in a concrete structure

βenefits

LIVEIN2 POWERED BY BHz

Thanks to this new range the LiveIn2 smartphone control solution now offers new functions.

INFORMATION FEEDBACK
I can see the status of my BHz shutters from the equipment menu in real time.

MORE PRECISION
I can select the opening setting for my shutter to the preferred position from the control menu.

Ha**β**its

Hz CONTINUITY

This new range does not require you to change your installation habits as they remain the same as with Hz radio, whilst the LiveIn2 solution at the centre of the range will ensure the continuity of your projects.

THE RANGE IN BRIEF

CONNECTED SOLUTION LIVEIN2

The LiveIn2 connected solution promises to fulfil the **information feedback** function made possible by this new BHz offer.
Enhanced with a complementary offer including a sun sensor and a scenario transmitter enabling you to take even greater advantage of the ease and peace of mind that this control system offers.

LOCAL CONTROLS

The simple BHz control points, whether mobile or wall-mounted, make it possible to control devices directly with the added benefit of maintaining the design of your installation.
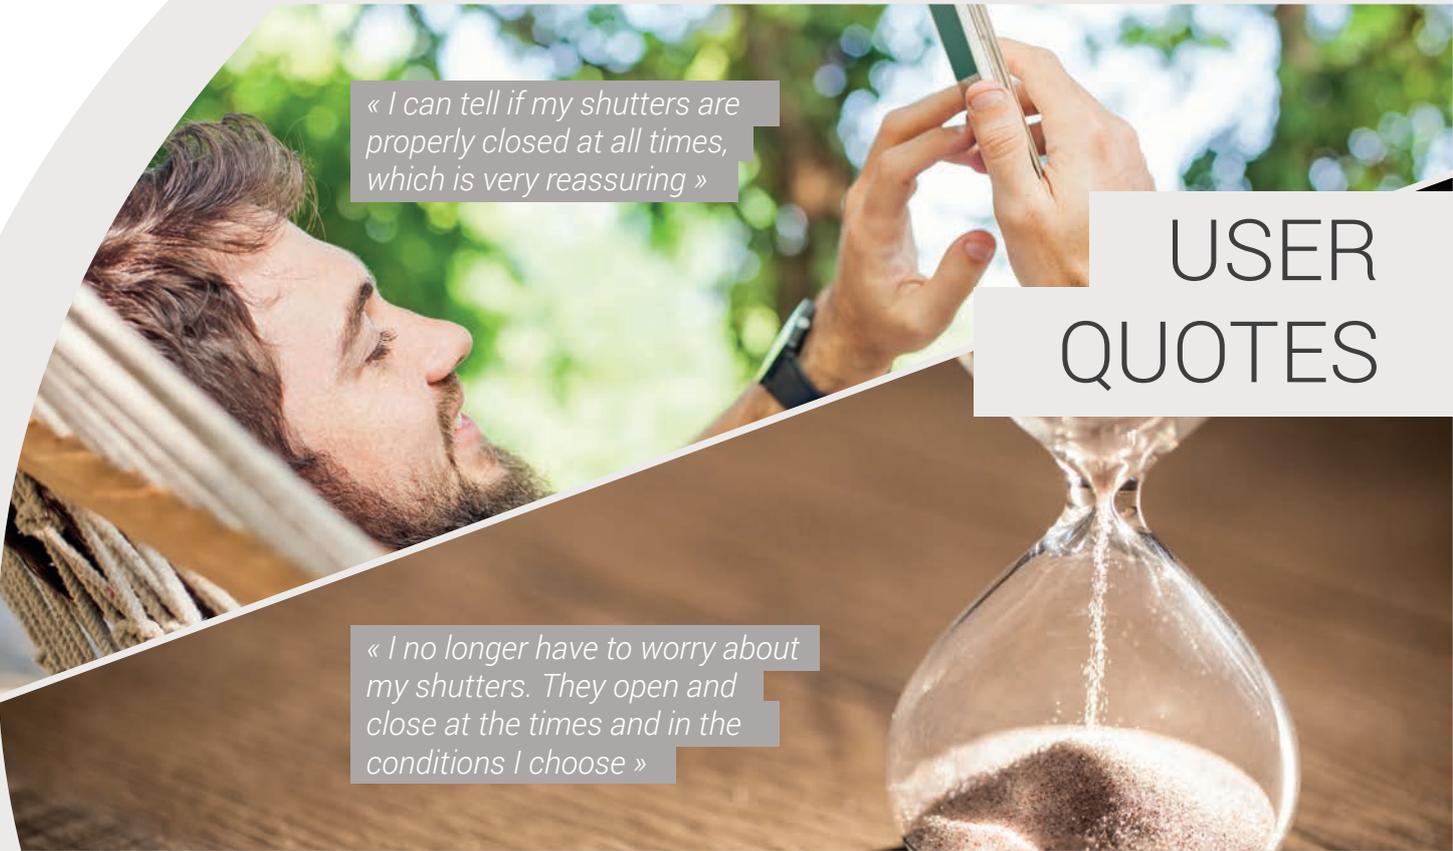

MOTORS

SIMU's range of BHz motorisations starts with the T3.5 E BHz, T5 E BHz and T5 AUTOSHORT BHz roller shutter motors.

USER
QUOTES

« *Controlling my equipment from the application is child's play* »
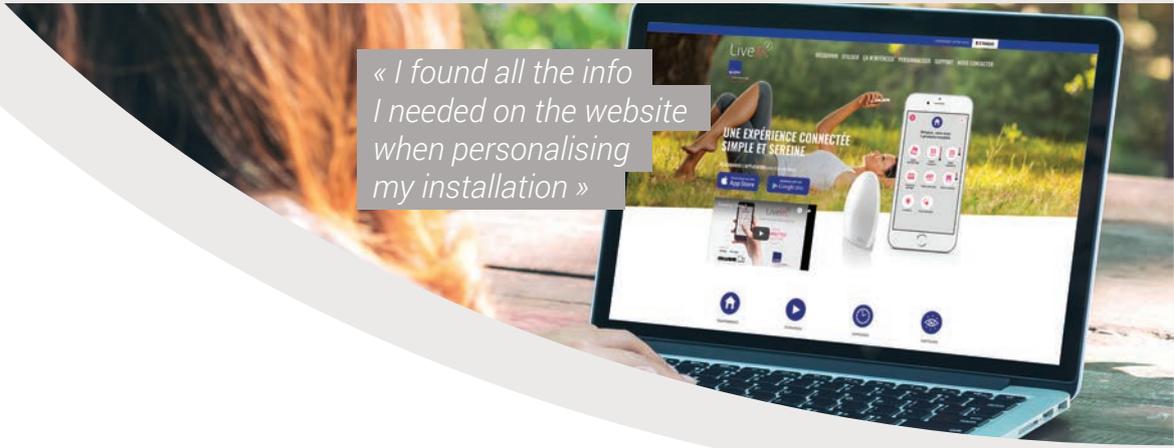

« *I can tell if my shutters are properly closed at all times, which is very reassuring* »

« *I no longer have to worry about my shutters. They open and close at the times and in the conditions I choose* »

« *I have opted for a long-term investment. I will be able to upgrade my installation at any time* »

« *I found all the info I needed on the website when personalising my installation* »
