

PROGRAMMABLE CLOCK TIMER AC

FOR ROLLER SHUTTERS

PROGRAMME THE OPENING AND CLOSING OF ROLLER SHUTTERS IN THE BLINK OF AN EYE

- **Flexible:** wired clock with 2 programming modes, daily (the same programme for the whole week) and weekly (different programmes for each day of the week).

- **Easily record programmes** thanks to its Memory function: simply press and hold the up or down button at the desired time to programme a command. This setting can also be done through the setting mode.

- **Security when you're away** thanks to its presence simulation function which varies the programmed schedules randomly.

- **Programming can be disabled at any time**, by pressing the stop button (black button) for 1 second.

- **Understated design:** TIMER AC fits in with any indoor style.

- **Sun / twilight sensor option:** When equipped with this sensor, the Timer AC can also automatically open and close the roller shutter according to the amount of sun and when night falls.

ASSEMBLY

EASY INSTALLATION IN 3 STEPS :

- 1 Connect then attach the power source to the recessed box (Screws included)
- 2 Clip on the frame
- 3 Connect the wired control module

Surface mounting is also possible. See the surface mounted box in the "compatible accessories" section mentioned below..
