

DECLUTCHING SECURITY BOX + SWITCH

& DECLUTCHING KEYSWITCH

**NEW HANDLING/DECLUTCHING SOLUTIONS FOR SIMU CENTRAL MOTORS.**

**2 products in 1:** Declutching security box and declutching keyswitch can both drive a motorized curtain and declutch the motor for manual handling in case of power failure.

**Robust and secure:** with their metal box they were designed to resist tampering and endured the toughest resistance tests in our laboratory.

**Compact and aesthetic:** the 2 control points with their reduced size and simple design integrate easily any environment.

**100% compliant with European standards.**

## COMPATIBILITY

TYPE OF COMPATIBLE PRODUCTS	COMPATIBLE PRODUCTS RANGE
Motors	Range of Centris (S, M, L, XL, XXL) wired motors 
Control boxes	Pro RSA-Hz box  SD 510 box 

## USE

Reminder

**Centris motor:** manually operated effortlessly in case of power failure.

The declutching system acts directly on the gearbox. It makes the motor totally free. The opening or closing of the curtain is thus very easy.
