

SCENARIO TRANSMITTER

LiveIn²TM

simu-BHz[®]
technology

PLAY YOUR FAVORITE SCENARIOS FROM A WALL CONTROL POINT

The scenario transmitter gives the opportunity to play two scenarios among those created in the LiveIn2 application.

100% COMPATIBLE WITH SIMU RADIO: through LiveIn2, it can control both Hz and BHz equipment.

EASY PROGRAMMING: from the LiveIn2 app, assign to each button of the transmitter a scenario so that you can launch it directly from the transmitter. If necessary, the choice of assigned scenarios may be modified.

PRACTICAL: it can be placed wherever you want; for instance at the entrance of his house, to play the scenarios «close all» / «open all». This control point will still operate with LiveIn2 box even if there is an Internet breakdown.

CUSTOMIZABLE: a collection of frames with stylish colours and decorations lets you to customise the wall transmitter and bring a unique touch to your decor.

To associate with the control solution

LiveIn²TM

Compatible with radio SIMU ranges:

simu-Hz[®]
technology

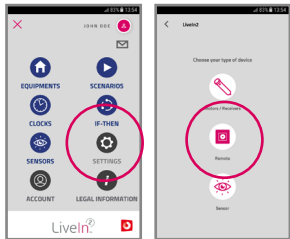

&

simu-BHz[®]
technology

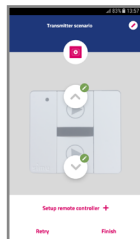

OPERATING PRINCIPLE

Before fixing the transmitter to the wall, make the following presets:

PRE-SETTINGS

1- In the LiveIn2 app, from the SETTINGS menu, add a device BHz «Remote». Let you guide by the application to pair the transmitter with its PROG button.

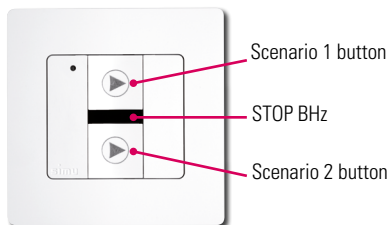

2- Then configure on each button of the transmitter the preferred scenario.

3- The scenario transmitter is ready to operate.

OPERATING *

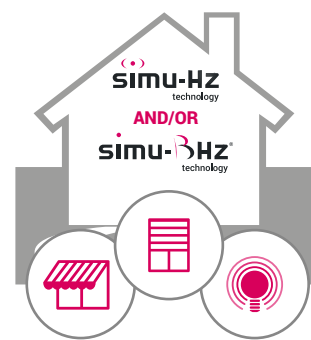

FROM THE TRANSMITTER, PLAY THE DEFINED SCENARIO. This one is transmitted to the LiveIn2 box.

THE LIVEIN2 BOX BROADCASTS THE SCENARIO'S COMMANDS ON THE INSTALLATION DEVICES.

SHUTTERS, AWNINGS OR LIGHTS TRIGGER ACCORDING TO THE CHOSED SCENARIO.

* Operates even in case there is a network breakdown on your Internet box
