MEMORY-Hz WALL TRANSMITTER

FOR ROLLER SHUTTERS, AWNINGS OR LIGHTING

simu-Hz
technology

SMART 1-CHANNEL WALL TRANSMITTER WITH 24-HOUR REPETITION FUNCTION

Convenience: no more worries about opening or closing your roller shutter. Thanks to the memory function , it will automatically open, close, and even go to the favorite position each day at the same time.

Practical: the lcd screen shows the remaining time before the next command, the activated functions and it alerts you in case of low battery.

Security when you're away thanks to the presence-simulation function which varies the programmed schedules randomly.

Easy to use, simply press and hold one of the buttons (up, favorite position, or down), at the desired time to record the command which will be repeated every 24 hours.

Automatic mode can be disabled at any time, to switch to manual control mode.

Elegant: both understated and modern, this new transmitter easily blends into any kind of decor. A collection of frames with stylish colours and decorations lets you customise the transmitters and bring a unique touch to your decor.
You'll find this signature in the entire collection of simu-hz transmitters.
